

Our Strength

Our team consists of highly qualified and experienced professionals who have proven expertise and successful track record in some of the most challenging parts of infrastructure projects including conceptualising, survey, investigation, design and project management.

Even though our team is quite capable of handling the consultancy of all types of infrastructure projects of any magnitude our core strength lies in the field of design (conventional, NATM & ADECO) and project management of tunnelling projects in all kinds of geological strata. Our uniqueness is that we can provide total solutions under one roof for civil, electrical, mechanical and ELV systems.

We are prompt in meeting our promises and delivery targets with the aid of state-of-the-art office capable of 2D and 3D model analysis.

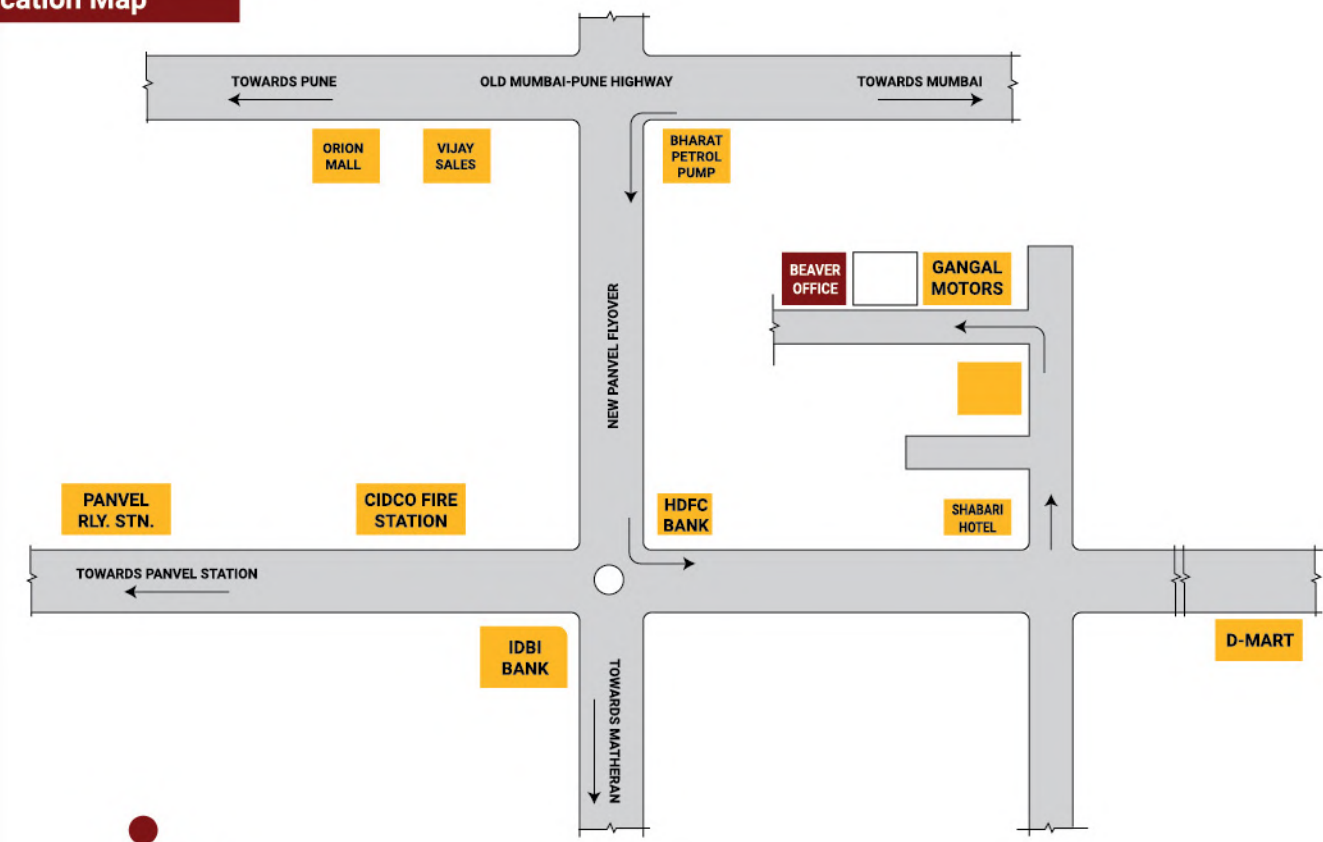

Furthermore, our commitment to high-quality standards and accuracy can be seen on our client referrals.
